

PRESS RELEASE

20 December 2016

Euro area monthly balance of payments (October 2016)

- In October 2016 the current account of the euro area recorded a surplus of €28.4 billion.¹
- In the financial account, combined *direct* and *portfolio investment* recorded net acquisitions of assets of €83 billion and net incurrences of liabilities of €17 billion.

Chart 1: Balance of payments of the euro area: 12-month cumulated transactions
(as a percentage of GDP)

Current account

The *current account* of the euro area recorded a surplus of €28.4 billion in October 2016 (see Table 1). This reflected surpluses for *goods* (€26.0 billion), *services* (€9.3 billion) and *primary income* (€6.1 billion), which were partly offset by a deficit for *secondary income* (€13.0 billion).

¹ References to the current account are always to data that are seasonally and working day-adjusted, unless otherwise indicated, whereas references to the capital and financial accounts are to data that are neither seasonally nor working day-adjusted.

The 12-month cumulated current account for the period ending in October 2016 recorded a surplus of €344.3 billion (3.2% of euro area GDP), compared with one of €320.2 billion (3.1% of euro area GDP) for the 12 months to October 2015 (see Table 1 and Chart 1). This was due to increases in the surpluses for *goods* (from €340.2 billion to €364.8 billion) and *services* (from €60.0 billion to €62.4 billion), as well as a decrease in the deficit for *secondary income* (from €132.5 billion to €129.9 billion). These were partly offset by a decrease in the surplus for *primary income* (from €52.6 billion to €47.1 billion).

Financial account

In October 2016 *combined direct and portfolio investment* recorded net acquisitions of assets of €83 billion and net incurrences of liabilities of €17 billion (see Table 2).

Euro area residents recorded net acquisitions of €95 billion of *direct investment* assets as a result of net acquisitions of both *debt instruments* (€54 billion) and *equity* (€41 billion). *Direct investment* liabilities increased by €27 billion as a result of net acquisitions of euro area *equity* by non-euro area residents.

As regards *portfolio investment* assets, euro area residents made net disposals of foreign securities amounting to €13 billion. This resulted from net sales/amortisations of *short-term debt securities* (€34 billion), which were only partly offset by net acquisitions of foreign *equity* and *long-term debt securities* (€13 billion and €8 billion respectively). *Portfolio investment* liabilities recorded a net decrease of €9 billion as a result of net sales/amortisation of euro area *short-term debt securities* (€20 billion) by non-euro area residents, which were partly offset by net acquisitions of euro area *long-term debt securities* (€11 billion) by non-euro area residents.

The euro area net *financial derivatives* account (assets minus liabilities) recorded positive net flows of €9 billion.

Other investment recorded increases of €155 billion in assets and €237 billion in liabilities. The net acquisition of foreign assets by euro area residents is mainly attributable to the *MFI sector (excluding the Eurosystem)* (€159 billion). The net incurrence of liabilities can also be explained by the *MFI sector (excluding the Eurosystem)* (€218 billion) and, to a limited extent, by *other sectors* (€16 billion).

In the 12 months to October 2016 *combined direct and portfolio investment* recorded increases of €779 billion in assets and €80 billion in liabilities, compared with increases of €1,195 billion and €851 billion respectively in the 12 months to October 2015. The most significant development was a shift in portfolio investment liabilities from net acquisitions of euro area securities by non-euro area residents (€383 billion) to net sales/amortisations (€70 billion).

Direct investment recorded decreases in the net acquisition of assets (from €748 billion to €354 billion) and in the net incurrence of liabilities (from €467 billion to €150 billion) in the 12 months to October 2016. The former resulted from a decrease in the net acquisition of foreign *debt instruments* (from €226 billion to €13 billion) and *equity* (from €522 billion to €342 billion) by euro area residents.

According to the monetary presentation of the balance of payments, the [net external assets](#) of euro area MFIs decreased by €244 billion in the 12 months to October 2016, compared with a decrease of €3 billion in the 12 months to October 2015. This reflected an increase in the surplus in the *current and capital account* balance (from €302 billion to €346 billion), which was offset by net financial transactions by non-MFIs. In particular, the cumulated transactions in portfolio investment liabilities issued by non-MFI euro area residents showed a shift from net purchases of *debt securities* by non-euro area investors (€220 billion) to net sales/amortisations (€187 billion).

In October 2016 the *Eurosystem's* stock of *reserve assets* decreased by €9.7 billion to €717.3 billion (see Table 3). This can largely be explained by negative price revaluations, particularly of monetary gold (€8.1 billion).

Data revisions

This press release incorporates revisions for the period from July to September 2016. These revisions resulted in an increase of the direct investment account by €39 billion for September 2016 and of the portfolio investment account by €18 billion for August 2016.

Additional information

- Time series data: [ECB's Statistical Data Warehouse \(SDW\)](#)
