**The Central Bank of Malta joins MAPS,
the Treasury Management System designed by and for central banks**

The Central Bank of Malta has officially selected [MAPS](#) -Market Activities Processing System- as the global solution to support its treasury and financial market operations, including portfolio management, reserves management and FX transactions, as well as its risk management and accounting treatment.

MAPS is the Treasury Management System for Central Banks provided by Banque de France and Banco de España. MAPS manages a wide range of financial instruments, spanning front and back-office, risk management, accounting and financial reporting functions. It comprises a technical platform and tailor-made solutions to cope with central banks' business needs. MAPS as a global offer provides a preconfigured solution based on Calypso software and a full set of hosting and running services as well as implementation, training and migration services for new joiners.

MAPS has been in operation since November 2016 serving Banque de France and Banco de España, and Central Bank of Cyprus since February 2020. The Nederlandsche Bank will join in April 2022. This allows MAPS to gain a unique and genuine experience in the delivery and the operation of a shared market service for central banks in line with ESCB guidelines. The entry of The Central Bank of Malta expands the MAPS user community of central banks, which impules MAPS as a common treasury management solution within the community of EU central banks.

MAPS is open to all the members of the European System of Central Banks (ESCB).
