

## Turnover in retail trade at the end of May 2018

14 June 2018

### Turnover in retail trade grew

Over the past three months, turnover in retail trade rose by 0.9% (adjusted for seasonal and working-day variations). This improvement was less marked for food (0.6%) than for industrial products (1.1%). Sales of consumer electronics, household appliances and footwear gained over 3.0%, whereas the games and toys, perfumes and scents, and the optical sector lost 5.5%, 0.9% and 0.1% respectively.

Large general retailers and more specifically distance selling benefited from stronger retail trade.

In May, retail trade was stable overall, down 0.1%; food sales put on 0.4%, while industrial product sales lost 0.7%. Hypermarket sales were up 2.2% and those of supermarkets gained 0.4%, but department store sales and distance selling fell.

### Total industrial goods and food sales: Q/Q-1 change

The past three months compared with the previous three; seasonally and working-day adjusted volume terms

-7% -6% -5% -4% -3% -2% -1% 0% 1% 2% 3% 4% 5% 6%

	Weight
Food products	43%
Industrial goods o/w	57%
Textiles and clothing	10%
DIY	7%
New automobiles	6%
Consumer electronics	5%
Perfumes and hygiene products	4%
Furniture	4%
Pharmaceuticals	3%
Household appliances	3%
Automobile equipment	3%
Footwear	2%
Optical equipment	2%
Press and stationery	2%
Watches, clocks and jewellery	2%
Sports equipment	1%
Books	1%
Games and toys	1%
Bicycles and motorcycles	1%

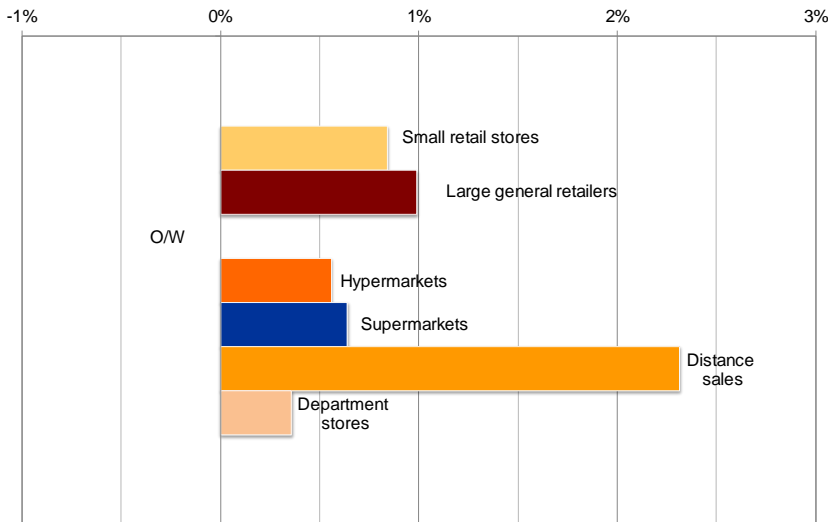

Notes :

- Sectors are classified according to the relative weight of the products included in the total aggregate of retail trade (see methodology)
- The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.

Period under review : May 2018

**Retail trade by certain outlet category: Q/Q-1 change**

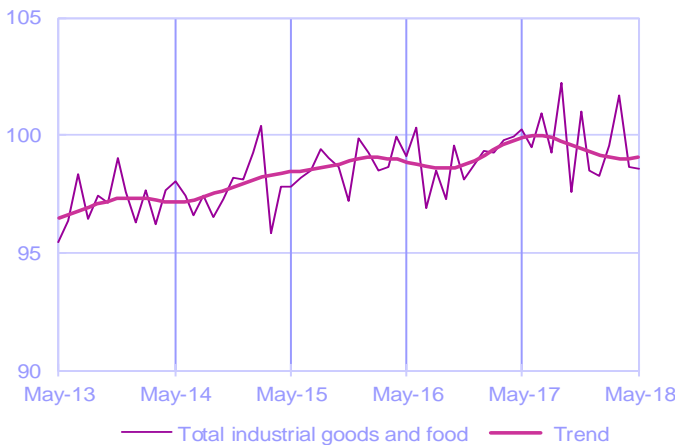

The past three months compared with the previous three; seasonally and working-day adjusted volume terms

Large general retailers	Weight
Hypermarkets	50%
Supermarkets	33%
Distance sales	11%
Department stores	6%

index in seasonally-adjusted volume terms (100 = 2010)

**Distance sales**

Source: Fevad and Banque de France

index in seasonally-adjusted volume terms (100 = 2010)

Provisional data as of the 7th working day following the month under review.

**Notes:**

- The Fevad and the Banque de France work together to publish data on product distance selling, including online sales, in France (excluding food sales).
- The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.
- Sectors are classified according to the relative weight of the distribution methods included in the aggregates for small retail stores and large general retailers (see methodology)
- However, the "large general retailer" aggregate is not a sub-aggregate of the "total industrial and food product" index. Rather, it is an independent index that covers the overall turnover of hypermarkets, supermarkets, department stores and distance selling. It does not cover national chains.
