

1<sup>st</sup> September 2021

## Interest rates on bank deposits – France • July 2021

### The average interest rates on bank deposits decreases in July at 0.41%

In July 2021, the average interest rate on bank deposits decreases from 0.43% to 0.41%. This variation is due to a lower rate on overnight deposits for both households and non-financial companies, induced by the modification of a regulation regarding the rate of consignment deposits and assimilated deposits under the custody of a public financial institution. The overnight deposits rate for these specific funds, such as notary repositories or rents received by social housing companies, was formerly 0.75% and is now 0.30%. On 31<sup>st</sup> July 2021, the share of the deposits in the scope of this modified regulation is less than 2% for the households and the non-financial companies.

#### Interest rates on outstanding amounts of deposits in percentage and seasonally adjusted (a)

Note: Due to rounding, the sum may differ slightly from the total of the components

- Interest rates presented here are effective rates calculated by dividing the accrued interest flows for the months under review by the monthly averages of the corresponding outstanding amounts. For the different types of deposits, including step-up deposits, they correspond to the average conditions practiced during the month under review by the French credit institutions on deposits of non-financial corporations and households (including non-profit institutions serving households) residents.
- Regulated rates passbooks include passbooks A, blue passbooks, sustainable development passbooks, home savings plans, youth passbooks and people's savings passbooks.
